

safe and reliable

Safety Shut-Off Devices

Quick-Closing Valve with mechanical High Integral Pressure Protection System (HIPPS)

Edition: 05.15

Subject to change without notice

APPLICATION AREA

- > Barrier between a high-pressure and a low-pressure section in Refineries, Chemical Plants and Gas compressor stations
- > Pipe systems for fluids and gaseous media for all industrial sectors

ADVANTAGE

- > redundantly control system
- > Resetting only on site
- > Independent from auxiliary power
- > Closing time < 1 sec
- > High safety level through zero leakage
- > Fully integral pilot valve system
- > Optimized design for long service life
- > Processing of high pressure flow rates
- > Environmental protection ensured
- > Heavy duty design for high performance applications
- > Reduction of the plant risk profile
