

KÜHME-Service for more safety and reliability

Edition: 10.16
Subject to change without notice

VALVE SERVICE

KÜHME valves are usually used in safety-relevant areas. They ensure a safe and reliable operation of power plants and other industrial plants. Therefore, it is of essential importance that the valves are checked and maintained on a regular basis.

Providing KÜHME-Service does not guarantee the perfect operation of the valves only. The KÜHME Service simultaneously extends the lifetime of the valves as well.

We offer you the complete service package over the whole operating life of your KÜHME-Safety Valves.

KÜHME-Service for more safety and reliability

OUR RANGE OF SERVICES

- > Commissioning
- > Maintenance contract
- > Supply of original spare parts
- > On-site maintenance or at the KÜHME facility
in Bochum, Germany
- > General overhaul at KÜHME facility in Bochum
- > Upgrade and refurbishment of old valve types

Principally all sealing elements are replaced.

Other spare parts as actuator springs, stem with bellow, guide bushing as well as accessories like solenoid valves, intermediate venting valves, etc. should be renewed after a period of operation of 9 years.

GUARANTEE

After service performed by KÜHME-Service technicians, we provide a guarantee of 8.000 operating hours, max. 12 months.

MAINTENANCE INTERVALS

Do you have questions about KÜHME-Service? Please contact us!

We will be pleased to submit you a non-binding and free offer.

For offer preparation we only need the fabrication number of the valve in question, which you will find on the respective nameplate.

We will be pleased to be at your disposal for a personal meeting on site.
